

# Flower Fertilizing Reference Guide

For years, we have relied on the quality of Jack's Classic fertilizers to give us the biggest, most beautiful hanging baskets and flowers. Superior to any other fertilizer on the market, Jack's will keep your flowers looking their best long after your friends and neighbors have given up on theirs. But with several blends available, what fertilizer is best for your flower needs?

Here are our top three blends and their recommended uses:

## All Purpose 20-20-20

---

- Benefits:** Balanced blend for even growth, flowering and overall plant health
- What to Feed:** All annuals, perennials, shrubs, and vegetables
- How Much to Use:** 1 Tbsp/Gallon once a week
- When to Use:** Alternate weekly with Jack's Blossom Booster throughout growing season

## Blossom Booster 10-30-20

---

- Benefits:** More flowers for added color on flowering plants; improves vegetable yields; root stimulator
- What to Feed:** All annuals, perennials, shrubs, and vegetables
- How Much to Use:** 1 Tbsp/Gallon once a week
- When to Use:** Alternate weekly with Jack's All Purpose throughout growing season

## Petunia Feed 20-6-22

---

- Benefits:** Added iron prevents yellowing on iron-hungry plants low phosphorus prevents leggy plants
- What to Feed:** Petunias, calibrachoa, bacopa, pansies, rhododendrons, and any other iron-hungry plants
- How Much to Use:** 1 Tbsp/Gallon once a week
- When to Use:** Alternate weekly with Jack's All Purpose or Blossom Booster at any point in the season, especially mid- to late summer
